

## EYE & EAR WEAR

### SunBuster ShootCorrect Eye Wear

SunBuster's new SportCorrect eye wear, designed for shooting, hunting, and fishing, is now available in ShootCorrect and FishCorrect versions that span more than a dozen ColorCorrect lenses in its Polychrome spectrum system. All SolaRex lenses are impact-resistant, six- or eight-base polycarbonate, and block 100% of UVA/UVB rays. Two Pentachrome lens systems are specifically designed for shooting, each containing the five best lenses to enhance and maximize performance under different light, target, and color conditions. They are available in both Maverick and Dude nylon frames featuring Ez-in-EZ-out lenses that ride higher on the face to maximize field of view and unobstructed line of sight vital to shooting. Both models are available with prescription insert lenses that fit behind the main lens. Just prior to the SHOT Show, SunBuster received the Product Ingenuity Award from the International Network of Golf Writer's Association during the 2006 PGA Merchandise Show in Orlando, Florida. Five-lens sets with frame, padded case, cloth, and lanyard retail for about \$100. (866) 786-2878; [www.sunbuster.info](http://www.sunbuster.info)
